

Shows alarms and staff presence in rooms in two colour plain text
Wide viewing angle for clear text display
Single-sided or double-sided

Corridor Display 5400

CareTech's Corridor Display 5400 is a green/red alphanumeric display intended for permanent installation as part of the CareTech System 5000. It can be installed as a single-sided or double-sided display on a ceiling or wall, and the design ensures an excellent viewing angle of around 170 degrees. Alarms are shown on the display in red plain text along with the alarm type and room number, e.g. "EMERGENCY ALARM, ROOM 4", and the built-in buzzer gives a distinctive audible signal at the same time. The volume setting is automatically adjusted for day and night. When staff have responded to an alarm the room number is shown in green signalling staff presence. The Corridor Display 5400 can also give audible and plain text alarms from the fire alarm system. When there are no alarms and no staff presence in rooms the display shows the date and time. The Corridor Display 5400 can also be connected to existing alarm systems, providing a high degree of flexibility for individuals in care.

At CareTech we develop our products and solutions in collaboration with customers and users. CareTech products and know-how offer users, care staff and relatives a reassuring complete solution that gives them extra peace of mind.

Corridor Display 5400

Technical data

Power supply	9–25 VDC
Power consumption	850 mA max. at 9.0 VDC
Mounting angle	125 mm
Display	Two lines of text, red and green 2 x 60 x 7 pixels Character size 5 x 7 pixels (22 x 31 mm)
Data bus	RS-485, programmable via RS-232/RS-485 Bit rate 9600 bps/56700 bps Protocol CareTech System 5000, compatible with CareTech System 4000
Alarm types	26, of which 5 are adjustable
Dimensions	308 x 124 x 41 mm
Mounting	On ceiling or wall, using bracket
